

Sangerfield Democratic Committee

To the residents of Sangerfield, NY

Resolution for Developing Renewable Energy

WHEREAS the burning of fossil fuels is a known source of carbon dioxide and other greenhouse gasses, and

WHEREAS these gasses are major contributors to human-caused climate change, resulting in turn in the warming planet Earth, and

WHEREAS said warming is melting vast ice sheets in the Arctic and Antarctic, threatening to cause sea levels to rise and overwhelm coastal areas, and

WHEREAS changing weather patterns related to climate change threaten to disrupt agriculture, a leading industry in Sangerfield, and the food supply thereby generated, and

WHEREAS renewable sources of energy can reduce the amount of fossil fuels needed to provide heat and electricity to homes and businesses, and

WHEREAS renewable resources such as wind turbine and solar farms in themselves affect land use, aesthetics and the environment,

WHEREAS the Town of Sangerfield has determined to develop a plan over the next year regarding the development of solar farms,

THEREFORE, the Sangerfield Democratic Committee supports the development of renewable energy for commercial and residential use, and supports the Town of Sangerfield's development of a plan for solar farms.

Adopted this 15th day of February, 2022.

Respectfully,

Town of Sangerfield Democratic Committee
